Factual Basis for this Request

Applicant filed PCT Application No. PCT/US2006/01028 on 22 March 2006 (Exhibits A and B). The subject PCT Application is a continuation-in-part of U.S. Patent Application No. 10/800,563 (Exhibit C). Accompanying Applicant's PCT Application was a Petition for Extension of Time and a check to cover the Petition fee (Exhibits D, E and F). The last Office Action on Application No. 10/800,563 prior to filing Applicant's PCT application was dated Sep. 22, 2006 (Exhibit G).

Remarks

Applicant's PCT application, Petition for Extension of Time and \$510 Petition fee were filed on 22 March 2006. The foregoing documents constituted Applicant's response to the Office Action of Sep. 22, 2005. Since this response included a Petition for a Three-month extension of time and the appropriate fee, the time limit for responding to the Office Action of Sep. 22, 2005, was March 22, 2006. Accordingly, it is believed that the foregoing documents were timely filed and that the appropriate fee was paid. It is also believed that this Request for Modification is being made promptly,

in view of the absences of Applicant's attorney, the Examiner and the Examiner's Supervisor from their respective offices for various periods of time during the summer months, and further in view of the absence of any delay in the examination of Applicant's PCT continuation-in-part application during the interval between the Notice of Abandonment (Exhibit H, pp 1,2) and this Request for Modification. Since the \$510 Petition fee was refunded (Exhibit I), authorization to charge Applicant's attorney's credit card for the subject Petition fee is being made with this electronic filing.

Request

Accordingly, request is hereby made to modify the Notice of Abandonment for Application No. 10/800,563 to indicate that it was expressly abandoned when Applicant's PCT continuation-in-part application No. PCT/US2006/010288 was filed on March 22, 2006.

Respectively submitted,

Title of the Invention:

Roof Gutter Cover Section With Water Draining Upper Surface

Related Application

This application is a continuation-in-part of U.S. Patent Application No. 10/800,563 filed Mar. 15, 2004, now abandoned.

Technical Field

The present invention relates to covers or shields adapted to be mounted over a roof gutter to keep out leaves and other debris, and more particularly to gutter covers that channel or drain the rainwater into the gutter principally through their upper surfaces.

Background Art

In the past, typical gutter covers have been formed with a substantially imperforate upper surface or top portion and with a relatively deep, water-channeling trough located near the area where the cover is attached to the front lip of the gutter. This arrangement was believed to provide the most durability, leaf-shedding ability and pleasing appearance. However, the imperforate top, deep trough gutter cover was somewhat limited in its versatility. Likewise, the water-channeling trough tended to require a relatively elevated front wall that, in turn, occasionally resulted in difficulty mounting the rear portion of the gutter cover on the roof structure without changing the position of the gutter. As a result of these limitations, installing these conventional gutter covers could be relatively laborious or even impossible in the case of older structures such as half-round or box-style gutters. It is also believed that there is a need in the industry for a gutter cover that is less expensive to produce and install than the aforementioned conventional cover. Thus, the present inventor was faced with the problems of devising a more versatile and less expensive gutter cover than those currently marketed.

Disclosure of the Invention

The present invention is a cover section for a roof gutter and is fashioned to extend longitudinally in overlying relation to a length of the gutter. The present cover section may
